**APC (Automatic Power Control) mode** allows to control the laser at a fixed output power set point. The device maintains a constant optical output power monitored with a photodiode. The current is adjusted automatically.

**ACC (Automatic Current Control) mode** is standard for all devices. The laser is controlled from diodes current set point.

**Modes of operation**

- **Current Set Point**
- **Power Set Point**
- **ACC**
- **APC**

**Applications**

- Distributed Raman amplification
- Remote EDFA pumping
- Pump splitting architecture
- Fiber optic component testing

**CRFL Series**

**CW Erbium Fiber Laser, Terahertz Line Width**

**Description**

CRFL series Raman fiber lasers provide high output power up to 20 W at 1455 and 1480 nm. The diffraction limited beam is unpolarized.

Principle of operation involves utilization of a high power Ytterbium fiber laser source to pump a cascaded Raman resonator. High conversion efficiency is achieved from fundamental pump laser to final Raman Stokes.

These Raman lasers are well suited for distributed Raman amplification, remote pumping of EDFAs or for Telcordia fiber optic component testing.

The CRFL are available in benchtop format for laboratory environment or in module format for easy integration into a system.

**Key Features**

- High output power up to 20 W
- Standard 1455 or 1480 nm operating wavelengths
- High efficiency frequency conversion
- Excellent power stability
- Non polarized output light
- Benchtop or module available
- Maintenance free

**3 Platforms**

- **B 130**
- **B 312**
- **M 701**

The CRFL series lasers are available as turn key system or as OEM module.

**RELIABILITY**  
The Keopsys range of fiber lasers are manufactured with tested components and are submitted to several inspections during the manufacturing process under a rigorous quality management certified in accordance with the ISO 9001:2008 standard. Our all-in-fiber systems offer maintenance free operation. Countless units are continuously running in demanding environments with no failure.

**GUARANTEE**  
Our fiber systems are under 1 full year parts and labor guarantee. We offer a warranty extension of 1 or 2 years. Please contact us.
